

Biometric Attendance System

BIOMETRIC ATTENDANCE SYSTEM AT COMMISSIONERATE OF HORTICULTURE

A biometric attendance system has been established at the Commissionerate of Horticulture & Plantation Crops at a cost of ***Rs. 0.15 Lakhs***. This has ensured punctuality in attendance at the Office. This has replaced a huge amount of paper work that in any case was not giving us a bird's eye view of punctuality in attendance. The new system enables the top management to zero in on employees who come perpetually late, so that they can be counselled and motivated to be punctual.

Impact

The new system has had a fantastic impact on attendance with employees vying with each other to beat the 10.10 a.m. deadline.
